INDEX TO
PHOTOGRAMMETRIC ENGINEERING
VOLUME XVI

This alphabetical index to subjects, authors, and ideas that appeared in the JOURNAL in 1950 is presented as a new feature this year in lieu of reprinting the separate tables of contents, which was done in the past. The index is compiled to facilitate finding and relocating reference subjects of interest. The forthcoming fourteen-year index by Miller and

Davidson, the 1949 index given on the pages immediately preceding, and this index now constitute a complete alphabetical listing of all the publications of this Society. This index, however, is not as complete as the fourteen-year compilation, inasmuch as rigid time limitations existed in order for the articles in these covers to be indexed here also.
