

PANEL DISCUSSION

INTEGRATION OF PHOTOGRAMMETRY INTO HIGHER EDUCATION*

PARTICIPANTS

Chairman and Moderator, Mr. Arthur J. McNair, Head of Surveying Department, College of Engineering, Cornell University.

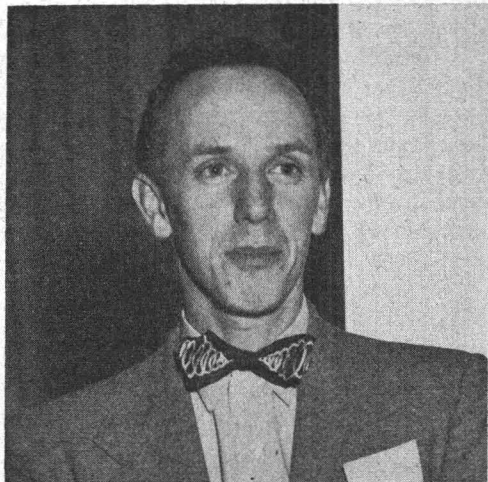

PAPERS	PAGE
<i>A Study of the Status of Photogrammetry in the Engineering Schools of the United States and Canada</i>	
Professor Russell C. Brinker, Civil Engineering Department, Virginia Polytechnic Institute.....	432
<i>Instruction in Photogrammetry at the University of Illinois</i>	
Professor W. H. Rayner, Civil Engineering Department, University of Illinois.....	442
<i>Suggested Equipment for Teaching Photogrammetry</i>	
Professor Lawrence Perez, Civil Engineering Department, Pennsylvania State College.....	446
<i>Higher Education for Photogrammetry in Government Mapping</i>	
Mr. Robert L. Moravetz, Assistant to Chief Topographic Engineer, U. S. Geological Survey.....	456
<i>Training in Photogrammetry for Highway Engineering</i>	
Mr. H. J. Spelman, Division Engineer, Bureau of Public Roads, Arlington, Va.....	458
<i>Training for Aerial Photographers and Commercial Mapping</i>	
Mr. J. R. Coltharp, President, Southwestern Aerial Surveys.....	461

DISCUSSION

Chairman McNair: The general conduct of the panel discussion this afternoon will be the presentation of six papers, with particular emphasis on the matters with which the speaker is most familiar. At the conclusion of those somewhat formal presentations, I expect to have questions from the audience and discussion.

You probably are much interested in where we now stand in the matter of education in photogrammetry here in the United States. Unfortunately, the survey has been made only for the civil engineering schools, but I believe Professor Brinker will be able to give us some insight into the situation there.

Professor Brinker is the Chairman of Committee Eight of the American Society for Engineering Education. This is the Surveying and Mapping Committee of the Civil Engineering Division of that Society. He has had considerable experience at various schools, teaching at the University of Hawaii, Southern California, and Minnesota. He is now in the Civil Engineering Department of Virginia Polytechnic Institute.

RUSSELL C. BRINKER

* Seventeenth Annual Meeting of the Society, Washington, D. C., Jan. 10-12, 1951.
