TECHNICAL PAPERS

Photogrammetry is the Key to Exploration of Space <i>Sherman M. Fairchild</i>	37
Practical Systems for Preservation of Optical Performance in Airborne Vehicle <i>Revere G. Sanders</i>	40
Analytic Aerotriangulation in the Coast & Geodetic Survey <i>Wm. D. Harris, G. C. Tewinkel and Charles A. Whitten</i>	44
Tests of Radar Doppler as a Tri-Lateration Device <i>E. M. Rhodes</i>	69
The Conditions Necessary for Plotting Stereo Models in which the Set Principal Distance is not the same as that of the Taking Camera <i>J. A. Eden</i>	73
Automatic Point Identification Marking and Measuring Instrument <i>Edward R. De Meter</i>	82
Photography Remains King in Aerospace Age <i>Brig. Gen. George W. Goddard</i>	88
Are Aerial Photographs Obsolete? <i>William A. Fischer and Richard G. Ray</i>	94

Announcement

PHOTOGRAMMETRIC ENGINEERING Important Changes Coming

Those who have been confused by the 5 issues-per-year basis will be highly pleased to learn that the Board of Direction has approved changing to 6 issues per year, that is bi-monthly.

The change will not be fully effective until 1963 with the January issue being numbered 1. In 1962 there will be 5 issues as now. The months of issue will be March, May (formerly April), July (formerly June), September and November (formerly December). For advertising, there will be no change in base rates, frequency reduction, agency commission and also the 2% if earned. Beginning with the second issue in 1962, the closing dates will be changed.
