

Photogrammetric Engineering

Volume XXXVI

December 1970

Number 12

Contents

COVER PHOTO—Oblique view of Lower Manhattan (New York City), looking west, taken with infrared film on Aug. 3, 1970, using an infrared-converted, 12-inch, K-17 camera. The exposure was $1/225$ of a second at $f/8$ with a minus-blue filter. The combination of the film and filter results in a near-normal looking photograph with extremely good haze penetration. The photo was supplied by Lockwood, Kessler & Bartlett, Inc. (*More cover photos are needed; send them to ASP whose address is at the bottom of this page.—Editor*)

TECHNICAL ARTICLES

Ocean Outfall Dispersion

Wesley James and Prof. F. J. Burgess 1241

Photo Inventory of Fine Logging Slash

William G. Morris 1252

Pseudo Radar

R. J. P. Lyon, J. Mercado, and R. Campbell, Jr. 1257

Independent-Model Triangulation

Dr. Paul R. Wolf 1262

New Programs for the Analytical Plotter
