## Notice to Contributors

1. Manuscripts should be typed, double-spaced on  $8\frac{1}{2} \times 11$  or  $8 \times 10\frac{1}{2}$  white bond, on one side only. References, footnotes, captions—everything should be double-spaced. Margins should be  $1\frac{1}{2}$  inches.
2. Ordinarily two copies of the manuscript and two sets of illustrations should be submitted where the second set of illustrations need not be prime quality; EXCEPT that five copies of papers on Remote Sensing and Photointerpretation are needed, all with prime quality illustrations to facilitate the review process.
3. Each article should include an abstract, which is a *digest* of the article. An abstract should be 100 to 150 words in length.
4. Tables should be designed to fit into a width no more than five inches.
5. Illustrations should not be more than twice the final print size: glossy prints of photos should be submitted. Lettering should be neat, and designed for the reduction anticipated. Please include a separate list of captions.
6. Formulas should be expressed as simply as possible, keeping in mind the difficulties and limitations encountered in setting type.
