Photogrammetric Engineering Remote Sensing

---

Volume LVIII

March 1992

Number 3

## Photogrammetric Measurement to One Part in a Million

Industrial photogrammetric measurement to accuracies of 1 part in 1,000,000 of the size of the object are discussed, with reference to a large compact range reflector.

Clive S. Fraser .....305

## Measuring Short Surface Waves with Stereophotography

The implementation of close-range stereophotography to measure directional wave number spectra of short gravity waves in the ocean is discussed.

Omar H. Shemdin and H. Minh Tran .....311

## A Global Approach for Least-Squares Image Matching and Surface Reconstruction in Object Space

The three tasks of object surface reconstruction from digital images—image matching, triangulation, and object-surface interpolation—are integrated into a single model in which the unknown parameters of a geometric and a radiometric model in object space are estimated in a least-squares adjustment.

Christian Heipke .....317

## A General Solution of a Closed-Form Space Resection

When three object control points exist, a maximum of four solutions for the six exterior orientation parameters can be found without iteration and initial information.

Zhuoqiao Zeng and Xibo Wang .....327

## Rectification of Digital Imagery

Different techniques for digital orthophoto generation from digitized aerial photographs and satellite images are compared.

Kurt Novak .....339

## First Experiments in Viewshed Uncertainty: Simulating Fuzzy Viewsheds

By numerical simulation of error in DEMs, it is possible to define a viewshed as a fuzzy spatial set, rather than the usual Boolean set.

Peter F. Fisher .....345

## Consequences of Enlarging Small-Format Imagery with a Color Copier

Enlarging small-format imagery with a laser-scanned copier crops 15 to 20 percent of the original image area; however, image deformation is relatively small.

William S. Warner and Øystein Andersen .....353

## Software Review: DRAGON Image Processing System Software

..... 324

---

### PE&RS

PE&RS (Photogrammetric Engineering & Remote Sensing) (ISSN 0099-1112) is published monthly by the American Society for Photogrammetry and Remote Sensing, 5410 Grosvenor Lane, Suite 210, Bethesda, MD 20814-2160. Second-class postage paid at Bethesda, Maryland and at additional mailing offices.

### SUBSCRIPTIONS

Subscription rate for nonmembers is \$120.00 per calendar year (add \$25.00 for international subscriptions). Membership dues include annual subscription to PE&RS (Photogrammetric Engineering & Remote Sensing) (\$34 members and \$15 student member). This subscription price is part of membership benefits and cannot be deducted from annual dues. Foreign Airmail subscription is \$215.00, US First Class Mail subscription is \$160.00. POSTMASTER: Send address changes to PE&RS, ASPRS Headquarters, 5410 Grosvenor Lane, Suite 210, Bethesda, MD 20814-2160

### MEMBERSHIP

Membership in the Society is open to any person actively engaged in the practice of photogrammetry, photointerpretation, remote sensing, and geographic information systems; or who by means of education or profession is interested in the application or development of these arts and sciences. The annual dues for Regular members are \$65.00. Annual dues for accredited Student members are \$25.00. Add \$20.00 for all international memberships to cover cost of postage. (All memberships are on a calendar year basis.) Printed in the United States of America.

Copyright 1992 by the American Society for Photogrammetry and Remote Sensing. Reproduction of this issue or any part thereof (except short quotations for use in preparing technical and scientific papers) may be made only after obtaining the specific approval of the Editor. The society is not responsible for any statements made or opinions expressed in technical

papers, advertisements, or other portions of this publication.

### PERMISSION TO PHOTOCOPY

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee of \$3.00 through the Copyright Clearance Center, Inc., 27 Congress Street, Salem, MA 01970, for copying beyond that permitted by Sections 107 or 108 of the US Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.

Cover Image – On 27 August 1991, these scenes of Route 15 and Patrick Street in Frederick, Maryland were flown and printed by Richard Crouse of Richard Crouse Associates, Frederick, Maryland. The images are a comparison of black and white photographs with and without electronic dodging. The image contrast of the dodged print was controlled by UDS-1 electronics installed into a MK Series printer.

UDS-1 upgrade kits for B&W and color are manufactured by Electronic Photo Controls, Inc. of Alexandria, Virginia.

PHOTOGRAMMETRIC ENGINEERING & REMOTE SENSING is the official journal of the American Society for Photogrammetry and Remote Sensing. It is devoted to the exchange of ideas and information about the applications of photogrammetry, remote sensing, and geographic information systems. The technical activities of the Society are conducted through the following Technical Divisions: Geographic Information Systems, Photogrammetric Applications, Primary Data Acquisition, Professional Practice, and Remote Sensing Applications. Additional information on the functioning of the Technical Divisions and the Society can be found in the July Yearbook issue of PE&RS.

## JOURNAL STAFF

**Publisher:** *William D. French*

**Editor-in-Chief:** *James B. Case*

**Executive Editor:** *Donald F. Hemenway, Jr.*

**Managing Editor/GIS News Editor:** *Joann H. Treadwell*

**Newsletter Editor:** *William D. Lynn*

**Engineering Reports Editor:** *Willard A. Kuncis*

**Advertising Sales Manager:** *Cheryl A. Stratos*

**Manuscript Coordinator:** *Lisa Campanella*

**Circulation Managers:** *Sokhan Hing, Anne Ryan*

## ASSOCIATE EDITORS

**Forestry, Plant Sciences:** *William J. Ripple*

**Geology, Water Resources, Hydrology:**

*Michael Abrams*

**Geography, Land Use:** *John R. Jensen*

**Professional Practice-Practical Papers:**

*John Grimson Lyon*

**Geographic Information Systems:**

*James W. Merchant*

**Primary Data Acquisition:** *William J. Campbell*

**Theoretical & Applied Photogrammetry:**

*Riadh H. Munjy*

**Book Review Editor:** *James B. Campbell*

**Software Review Editor:** *Daniel L. Civco*

Correspondence relating to all business and editorial matters pertaining to this and other Society publications should be directed to the American Society for Photogrammetry and Remote Sensing, 5410 Grosvenor Lane, Suite 210, Bethesda, Maryland 20814-2160, including inquiries, memberships, subscriptions, changes in address, manuscripts for publication, advertising, back issues, and the MAN-UALS OF PHOTOGRAMMETRY AND REMOTE SENSING. The telephone number of the Society Headquarters is 301-493-0290; the fax number is 301-493-0208.
